Minnesota Chart Catalog

2006

(Last updated January 10, 2006)

Includes:

Chart Name, Chart Number, Scale, Authorized Minnesota Sales Agents

Color Key for Charts

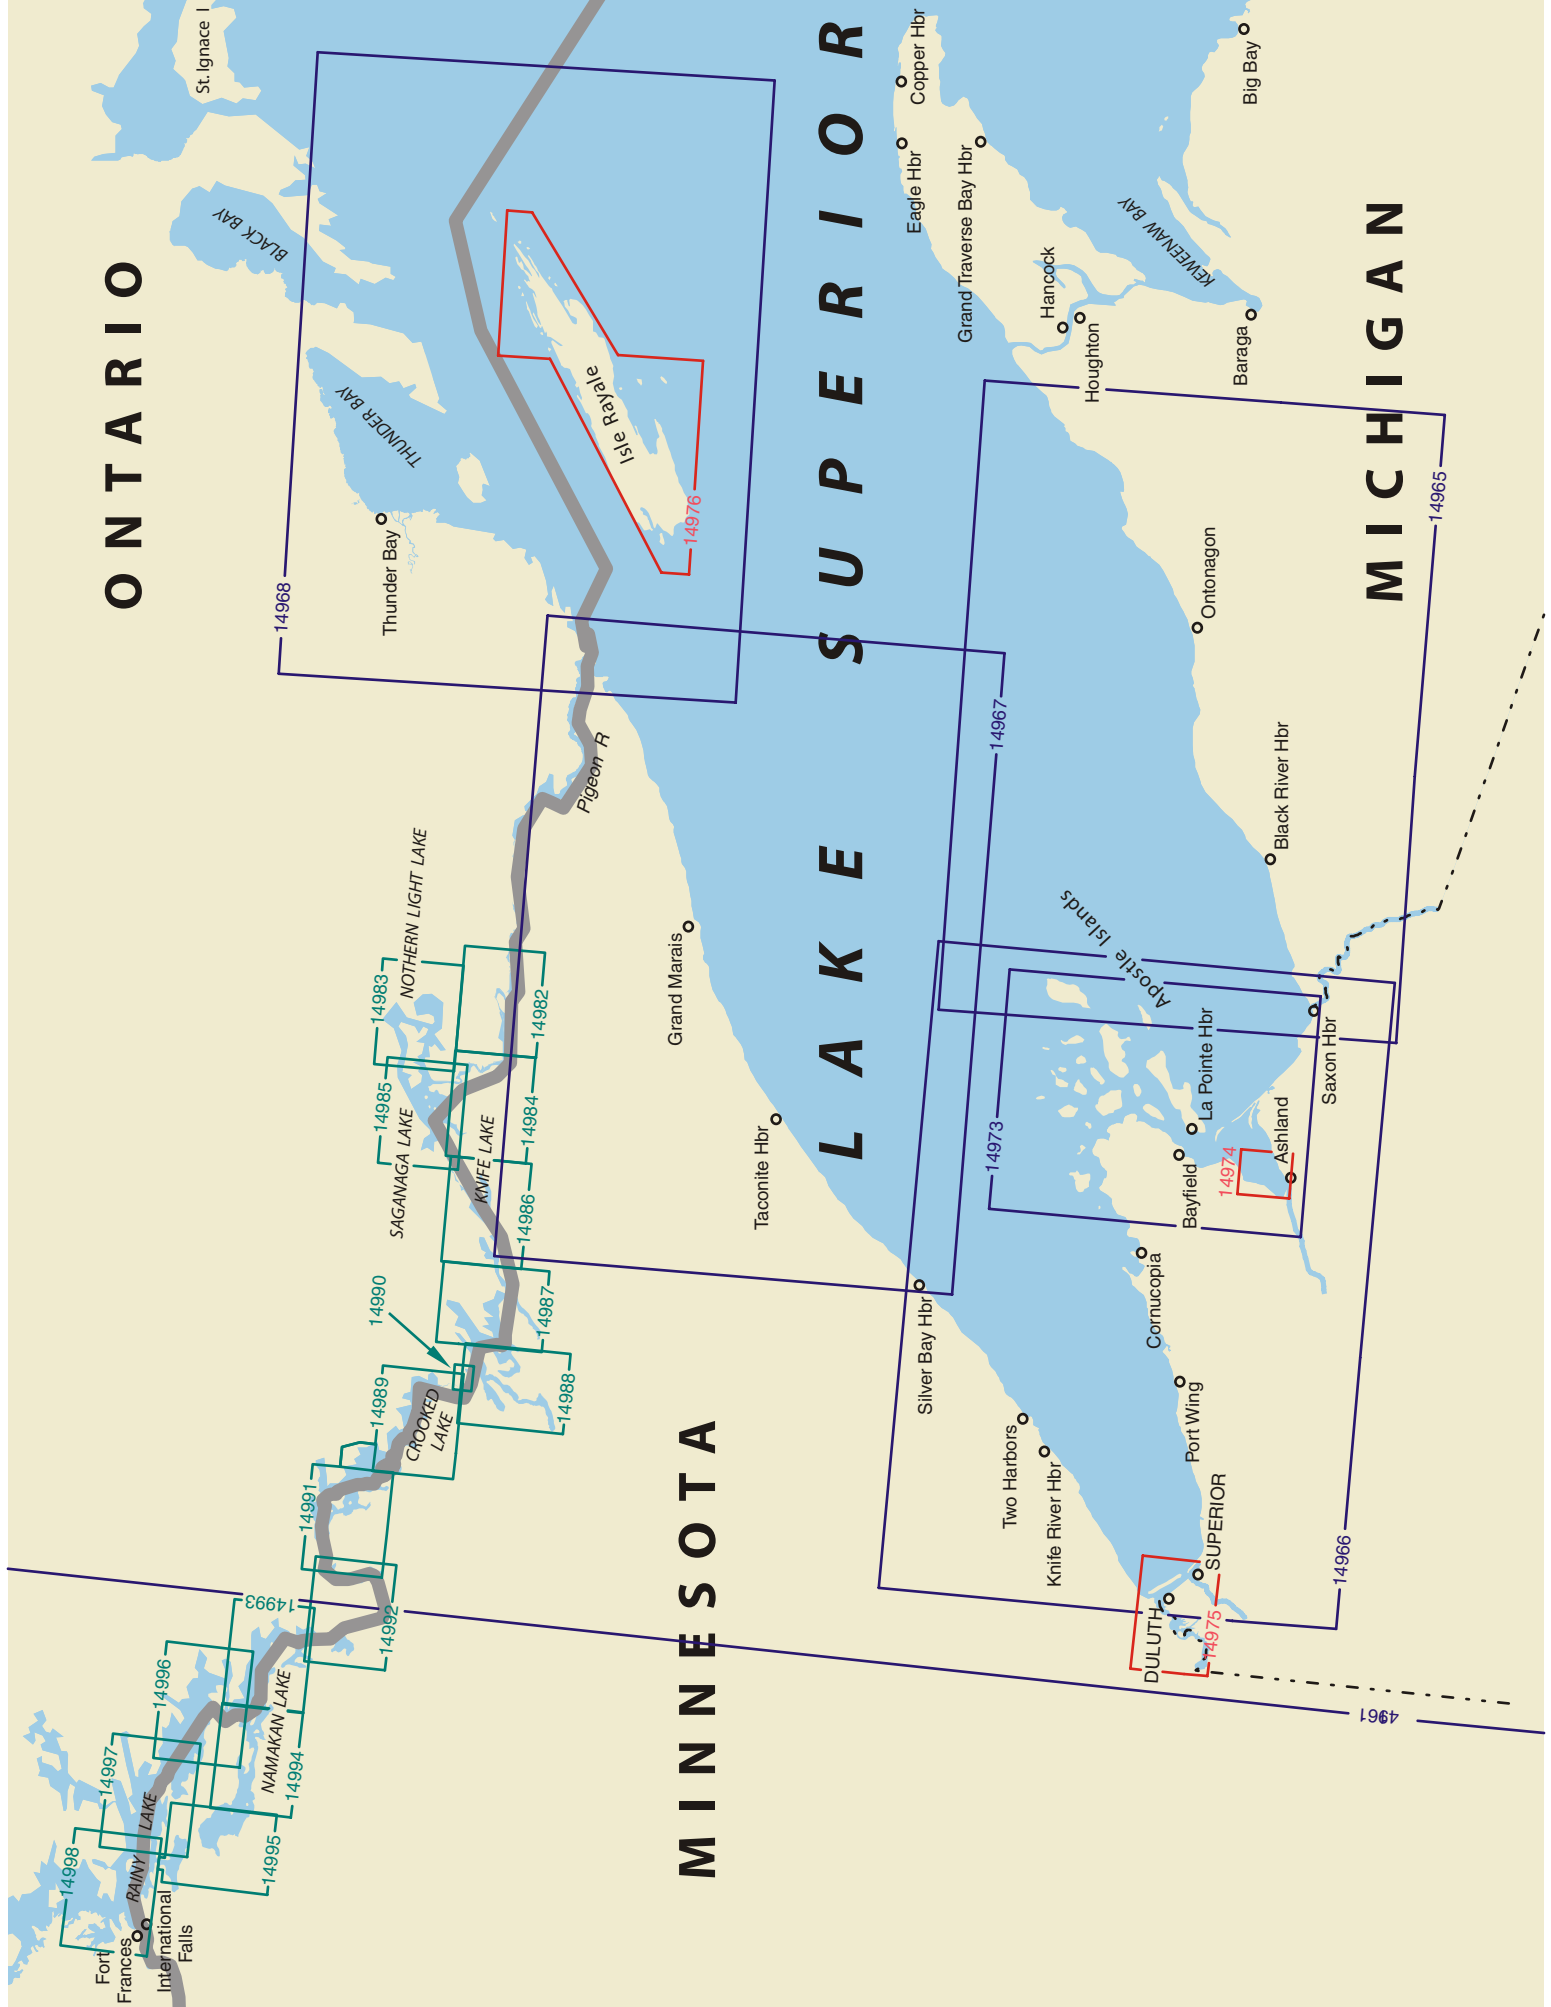

| Type of Chart | Scale | Purpose |
|--|------------------------|---|
| HARBOR CHARTS (outlined in red) | 1:50,000 and larger | For navigation and anchorage in harbors and small waterways. |
| COAST CHARTS (outlined in purple) | 1:50,001 to 1:150,000 | For coastwise navigation inside the offshore reefs and shoals, entering bays and harbors of considerable size, and navigating certain inland waterways. |
| GENERAL CHARTS (outlined in purple) | 1:150,001 to 1:600,000 | For use when a vessel's course is offshore but when it's position can be fixed by landmarks, lights, buoys, and characteristic soundings. |
| SAILING CHARTS (outlined in purple) | 1:600,001 and smaller | Plotting charts used for offshore sailing between distant coastal ports and for approaching the coast from the open ocean. |
| SMALL-CRAFT CHARTS (outlined in green) | 1:80,000 and larger | Specially designed charts with small craft information. |

The scale of a chart is the ratio of a given distance on the chart to the actual distance that it represents on the earth. (Example: One unit of measurement on a 1:10,000 scale chart is equal to 10,000 of the same unit on the earth's surface.) **Large-scale charts** show greater detail of a relatively small area. **Small-scale charts** show less detail, but cover a larger area. Certain hydrographic information may be omitted on smaller-scale charts. Mariners should always obtain the largest-scale coverage for near shore navigation.

IMPORTANCE OF UP-TO-DATE NAUTICAL CHARTS

The date of a chart is of vital importance to the navigator. When charted information becomes obsolete, further use of the chart for navigation is dangerous. Natural and artificial changes, many of them critical, are occurring constantly; therefore it is important that navigators use up-to-date charts. Corrections to NOAA Nautical Charts are published weekly in the U.S. Coast Guard's Local Notice to Mariners. (www.navcen.uscg.gov/lnm/default.htm)

New NOS products are not to be used until their availability is announced in the Notice to Mariners. All products should be promptly annotated with the Notice to Mariners number that authorizes their use. This will ensure that only valid products are used.

Minnesota Chart

| Chart Number | Title | Scale | Chart Number | Title | Scale |
